Profile

Senior Software Engineer / SDE II with 5.9+ years of experience delivering scalable, production-grade full-stack and backend systems using Node.js, React.js, Next.js, MongoDB, REST APIs, and AWS across enterprise and fintech domains. Proven track record of shipping high-performance applications, backend services, and API integrations for large-scale production environments. Hands-on experience integrating Generative AI capabilities — LLM integration, prompt engineering, Retrieval-Augmented Generation (RAG), AI-powered chatbot development, and agentic AI workflows — using LangChain, LangGraph, Gemini, and Python. Strong problem-solving skills across the full software development lifecycle, from development and integration to deployment and production support.

Experience

Senior Software Engineer | WIPRO LTD | DEC 2025 – PRESENT

- Consistently deliver 3-4 user stories (8-10 story points) per two-week sprint on enterprise-grade production applications for global clients including Meta and State Street
- Contribute to a rigorous multi-stage development and QA process — spanning local, staging, and production environments — that maintains near-zero defect leakage to production
- Support AI/LLM-powered application initiatives through LLM integrations and prompt engineering, enhancing application capabilities within existing enterprise workflows
- Collaborate cross-functionally with engineering, product, and QA teams on feature development, debugging, root-cause analysis, and code reviews, following Agile development practices

Software Engineer | Formidium Technologies | MAY 2022 – NOV 2025

- Led and delivered a major project using Node.js, React, and MongoDB, resulting in a 20% increase in user engagement
- Developed and implemented RESTful APIs with Node.js and Express, reducing server response time by 25%
- Designed and optimized MongoDB schemas for a high-traffic application, improving query performance by 40%
- Mentored junior developers through code reviews and training sessions, improving team productivity and code quality
- Collaborated with UX/UI teams to deliver responsive, accessible web applications, improving user satisfaction scores
- Refactored legacy codebase to modern JavaScript (ES6+) standards, reducing code complexity and improving maintainability

Junior Software Engineer | Formidium Technologies | JULY 2021 – APRIL 2022

- Contributed to scalable web applications using Node.js, Express.js, React.js, and MongoDB
- Built modular, reusable front-end components with React, improving development speed by 15%

- Participated in API integration and backend logic implementation, accelerating feature delivery timelines
- Investigated and proposed architectural alternatives to support continuous improvement

Graduate Engineering Trainee | Formidium Technologies | MARCH 2021 – JUNE 2021

- Gained hands-on experience with React.js for component-based development and state management
- Performed debugging and cross-browser testing to ensure application consistency
- Actively participated in Agile ceremonies including stand-ups, sprint reviews, and retrospectives

Android App development | Rawattech | JAN 2021 – MARCH 2021

- Android app development through React Native

Technical Analyst | Requin solutions pvt. Ltd | SEP 2020 – JAN 2021

- Java development

Education

B.Tech. Computer science - 8.2 cgpa | JUNE 2017-AUGUST 2021 | Jecrc University, JAIPUR, RAJASTHAN

12TH Disha Delphi Global Sr. Sec. School | Kota, RAJASTHAN

Skills & Abilities

- **Frontend:** React.js, Next.js, JavaScript, TypeScript, HTML/CSS, Tailwind CSS, Bootstrap
- **Backend:** Node.js, Express.js, Sails.js, FastAPI, RESTful APIs, GraphQL, Microservices
- **AI & GenAI:** LLM Integration, LangChain, LangGraph, Retrieval-Augmented Generation (RAG), Prompt Engineering, Tool Calling, Structured Output, AI-Powered Chatbot Development, Agentic AI Workflows, Gemini, OpenAI API, Tavily, LangSmith
- **Databases & Search:** MongoDB, PostgreSQL, SQL Server, MongoDB Vector Search, Vector Databases, Similarity Search
- **Cloud & DevOps:** AWS, Docker, CI/CD Pipelines, GitHub Actions, Jenkins
- **Messaging & Caching:** Redis, RabbitMQ, Kafka, AWS SQS
- **Version Control:** Git, GitHub, Bitbucket
- **Testing & Development:** Jest, Debugging, Agile Development Practices, Code Reviews
- **Other:** Third-Party API Integration, Payment Gateway Integration, Responsive Web Development

Projects

- **Pulse** – Cloud-based communication platform for team and email campaigns with custom templates, SSO authentication, and real-time analytics, built using **Node.js, React, and MongoDB**. **Integrated an AI-powered chatbot using a Retrieval-Augmented Generation (RAG)** approach to deliver intelligent, context-aware responses and enhance user engagement.
- **MoveMate AI** – Built an **AI-powered relocation assistant** using **LangGraph, Gemini, FastAPI, and Next.js** to help users discover rental apartments through natural-language queries. Implemented LLM tool calling, structured data extraction, real-time web search with Tavily,

preference-based filtering, nearby gym discovery, conversation state/memory, and LangSmith observability for a production-oriented GenAI workflow.

- [Sarvesh Art](#) – Developed a full-stack e-commerce platform for selling original Indian oil paintings and prints. Built customer-facing shopping flows including product discovery, wishlist management, cart and checkout, payment gateway integration, and email workflows. Implemented a rule-based Art Assistant to handle visitor queries around artworks, pricing, commissions, shipping, and workshops.
- [Tax O Wealth](#) – Developed a financial services platform for tax planning, wealth management, and financial advisory. Implemented user authentication, financial planning tools, and a secure client portal for tax optimization strategies and reports.
- [CommonSubDoc.com](#) – Developed a collaborative platform with user authentication, document version control, and real-time notifications to streamline team productivity.
- [AltsMarketplace.com](#) – Developed an e-commerce platform for alternative investments, enabling users to trade niche assets like collectibles, art, and rare items.
- [Lusora.in](#) – Developed a premium mineral water brand website with a clean, responsive UI to highlight products and brand story, focused on a seamless cross-device experience for the FMCG space.

Certificates

- [Langchain - Foundation](#)
- [AWS Partner: Generative AI Technical](#)
- [Claude Certified Architect – Foundations](#)
- [Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate](#) — Oracle (Oct 2025)
- [MTA: Software Development Fundamentals](#) | Microsoft
- Automation Anywhere Certified Advanced RPA Professional (V11.0)
